OpenAthens Documentation

Welcome to the OpenAthens documentation home page, here you will find the documentation for our products

OpenAthens for libraries, information managers and IT departments

- OpenAthens - A complete hosted service for the management of single sign on access to SAML services
- Third party applications - Guidance on connecting OpenAthens to other applications such as Moodle or ADFS
- OpenAthens LA (Local Authentication) (legacy documentation)

If you're looking for information about working from home, see:
How do I work from home

OpenAthens for publishers and service providers

- OpenAthens Wayfinder - A free to use service for organisation discovery over multiple federations
- OpenAthens Keystone - Middleware to easily connect OpenID Connect to SAML federations
- OpenAthens Federation - The international SAML federation
- OpenAthens SP (legacy documentation)

If you are an end-user, you will need to seek help from your local OpenAthens administrator rather than from these pages. They can usually be found via the library service or equivalent at your organisation, and you can look up any details they have provided via the forgotten password page at: https://login.openathens.net/auth#forgottenpassword
