

# How to see what your users have done

The [auditing](#) function via *Statistics > Auditing* will tell you about the important actions that have happened across your organisation.

For more detailed information about an individual account you can look at the activity tab on that account's detail page. You can jump to the account's details page from the audit page by clicking the account username.

The screenshot shows the OpenAthens user interface for the account 'spudbjohnson002'. The page is titled 'Modify account' and has tabs for Password, Account, Permissions, Notes, and Activity. The Activity tab is selected, showing a list of actions performed by the user. The actions include password changes and email updates. The user's profile information is visible on the left, including their name, creation date, and expiration date.
