

Federation metadata

The OpenAthens Federation Metadata is published at: <http://fed.openathens.net/oafed/metadata>

ETag support

If your application supports it, you can check the [ETag](#) and avoid re-fetching unchanged metadata

EntityAttributes

Optional and may not appear for all entities. We use the macedir.org specification.

Hide from discovery:

<http://macedir.org/entity-category>

```
md:EntityDescriptor > md:Extensions > md:EntityAttributes > saml:Attribute#http://macedir.org/entity-category
  • <saml:AttributeValue>http://refeds.org/category/hide-from-discovery</saml:AttributeValue>
```

Entity categories

<http://macedir.org/entity-category-support>

```
md:EntityDescriptor > md:Extensions > md:EntityAttributes > saml:Attribute#http://macedir.org/entity-category-support
  • <saml:AttributeValue> http://refeds.org/category/research-and-scholarship </saml:AttributeValue>
  • <saml:AttributeValue> http://www.geant.net/uri/dataprotection-code-of-conduct/v1 </saml:AttributeValue>
```

Extensions

Extensions are usually unique to a federation and names can be different. These are ours:

```
md:EntityDescriptor > md:IDPSSODescriptor > md:Extensions > mdui:UIInfo
  • mdui:DisplayName
  • mdui:Description
  • mdui:Logo
```

Logos, where present, may have small and/or large versions. Extensions can be unique to a federation
