

OpenAthens LA End of Life Announcement

On 15 November 2018 all customers identified as using OpenAthens LA (OALA) were informed that it was approaching the end of its life and that all support will cease on 31 March 2020.

You are encouraged to migrate at your next opportunity. Our hosted OpenAthens product includes the following features that OALA users may be interested in:

- As well as the option to create accounts on the system, OpenAthens can use many connectors for [local authentication](#) including: ADFS, Azure, CAS, G-Suite, LDAP and SirsiDynix. There is also an API option for anything you can access programmatically.
- Recently enhanced [statistics and reporting](#) options
- Flexible [release policies](#)
- A [redirector function](#) where the same links can be used onsite and off
- A managed proxy service
