

# Management menu

This menu covers items that affect the organisation rather than the individual.

## MyAthens

Allows you to control several aspects of the [MyAthens portal](#) including logo, panels and whether or not users can change their email address.

## Connections

This page allows you to [manage the connections](#) of your organisation to access management federations and local authentication sources.

## Groups

[Account grouping functions such as create and list](#)

## API keys

[Generate and manage API keys used by your organisation](#)

## Self registration

If your subscription includes a custom [self registration](#) option then details will be displayed here including the registration / re-registration address(s) and any validation details. The re-registration link is something you might choose to include in your account expiring [email template](#).
