

Auditing

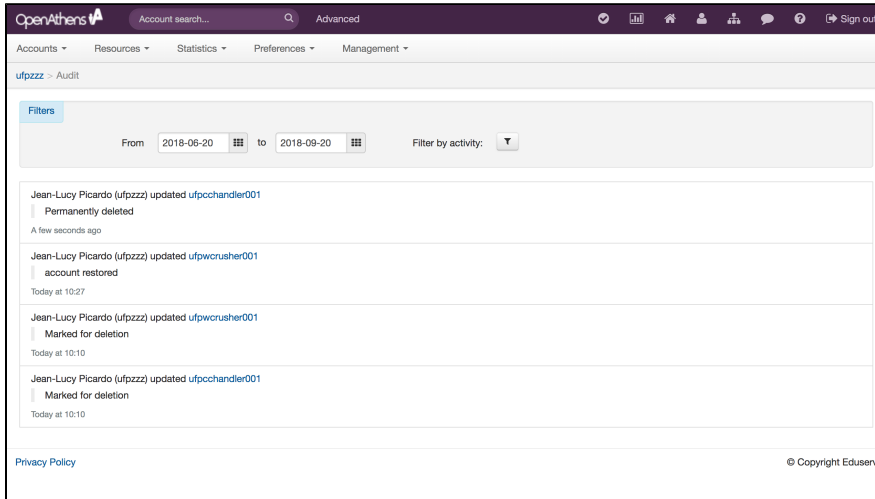

Path to function: **Statistics > Auditing**

Where reporting concentrates on resource access, authentication and lifecycle stages, the audit function shows you what has been done to the accounts.

To see the main activities over all accounts

The audit page displays a combined stream of the main activities across all of your accounts actions - it includes things such as created, activated, and deleted but skips things such as email address or password changes. Clicking on a username will take you to that account's details page and a filter is available if you are interested in specific activities.

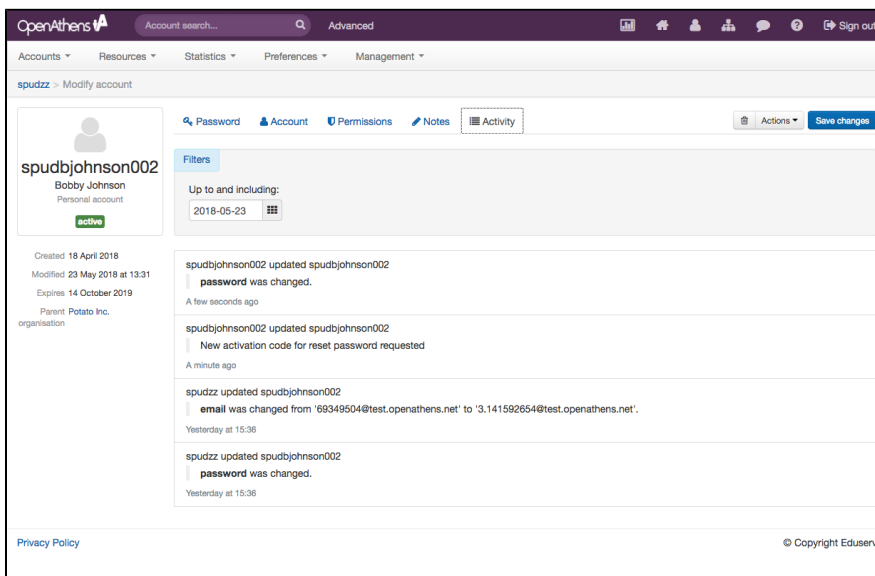

To look further back in time use the date range at the top or the see more option at the bottom.

The screenshot shows the OpenAthens interface with the 'Audit' page selected. The page title is 'upzzz > Audit'. There are navigation tabs for 'Accounts', 'Resources', 'Statistics', 'Preferences', and 'Management'. A 'Filters' section is visible with a date range from '2018-06-20' to '2018-09-20' and a 'Filter by activity:' dropdown. The main content area displays a list of activities for the account 'upzzz' performed by 'Jean-Lucy Picardo (upzzz) updated uppcchandler001'. The activities include: 'Permanently deleted' (A few seconds ago), 'account restored' (Today at 10:27), 'Marked for deletion' (Today at 10:10), and 'Marked for deletion' (Today at 10:10). The footer includes 'Privacy Policy' and '© Copyright Eduseriv'.

To see detailed activity for a single account

In the account details, go to the activity tab where you will see details of the latest activity. The see more option bottom of the list will load up older activity and for larger hops back in time you can change the date. This view includes more activities than the organisation view - e.g. changes to the email address.

The screenshot shows the OpenAthens interface with the account details page for 'spudbjohnson002' selected. The page title is 'spudbjohnson002 > Modify account'. There are navigation tabs for 'Password', 'Account', 'Permissions', 'Notes', and 'Activity'. The 'Activity' tab is active. A 'Filters' section is visible with a date range 'Up to and including: 2018-05-23'. The main content area displays a list of activities for the account 'spudbjohnson002' performed by 'spudbjohnson002'. The activities include: 'password was changed.' (A few seconds ago), 'New activation code for reset password requested' (A minute ago), 'email was changed from '69349504@test.openathens.net' to '3.141592654@test.openathens.net'.' (Yesterday at 15:36), and 'password was changed.' (Yesterday at 15:36). The left sidebar shows account details: 'Created 18 April 2018', 'Modified 23 May 2018 at 13:31', 'Expires 14 October 2019', and 'Parent: Potato Inc. organisation'. The footer includes 'Privacy Policy' and '© Copyright Eduseriv'.

Anything to watch out for?

When an account leaves your control or is permanently deleted you will no longer be able to access its details or the detailed activity there.
