

# Maven settings for Java OASP

Update files as follows:

## path/.m2/settings.xml

```
<servers>
  <server>
    <id>eduserv</id>
    <username>USERNAME</username>
    <password>{SecurePasswordReference}</password>
  </server>
</servers>
```

For information on how Maven encrypts and uses server passwords, see <https://maven.apache.org/guides/mini/guide-encryption.html>

## path/pom.xml

```
<repositories>
  <repository>
    <id>eduserv</id>
    <url>https://repo.openathens.net/maven</url>
  </repository>
</repositories>

...

<dependency>
  <groupId>uk.org.eduserv.iam</groupId>
  <artifactId>openathens-sp</artifactId>
  <version>2.1.2</version>
  <type>pom</type>
</dependency>
```

The id for both the repository and server must be 'eduserv'

Build from the repository according to your Maven instance. No additional setup should be required (e.g. environment variables)
