

Integrating OpenAthens with the ASP.NET pipeline in IIS classic mode

In your IIS Manager:

1. In the server node, select the ISAPI and CGI Restrictions option
2. Enable the `aspnet_isapi.dll` for your version of .NET
3. In the sites node, navigate to the site and select the Handler Mappings option
4. Actions > Add Script Mapping
5. Set:
 - a. Request path: *
 - b. Executable: path to the `aspnet_isapi.dll` that you enabled earlier
6. Click the request restrictions button and clear the "Invoke handler only if request..." option.
7. Ok
