

OpenAthens Access Home

OpenAthens Access encompasses all our publisher technologies:

- OpenAthens federation (an international, multi-sector SAML federation)
- OpenAthens Keystone (allows OpenID Connect to be used in SAML federations)
- OpenAthens SP (a standards complaint SAML service provider software, [being retired](#))

All are configured and managed via the [publisher dashboard](#).

The main pages in this section are:

- [OpenAthens federation](#)
 - [About federation and federated access management](#)
 - [Joining the OpenAthens federation](#)
 - [Technical recommendations](#)
 - [Best practices](#)
 - [Federation metadata](#)
 - [OpenAthens IdP elements](#)
 - [How to add the OpenAthens federation to common SP software](#)
 - [Standard attributes in the OpenAthens federation](#)
 - [Glossary](#)
 - [WAYFless access and deep linking in the OpenAthens Federation](#)
- [OpenAthens Keystone](#)
 - [What is OpenAthens Keystone](#)
 - [Integrate OpenAthens Keystone](#)
 - [OpenAthens test accounts](#)
 - [OIDC to SAML terminology translation](#)
 - [Understanding your federation customers](#)
 - [Getting production ready](#)
 - [Publisher dashboard reference guide](#)
 - [How to migrate to Keystone from OpenAthens SP](#)
- [OpenAthens Wayfinder](#)
 - [Enabling OpenAthens Wayfinder](#)
 - [OpenAthens Wayfinder UX](#)
- [Release notes - Publisher](#)
- [OpenAthens SP end of life notice](#)
